Hazardous Weather

Highs today will be warm, in the 80s to low 90s, but still below normal for this time of year. There is a chance of storms today, mainly across the Big Bend Area, Davis Mountains, and Marfa Plateau. Isolated storms are also possible further north through the Van Horn Highway 54 corridor and into the Guadalupe Mountains. Primary threats with any storms that develop are locally heavy rainfall and frequent lightning.

A mid level trough over the western Rio Grande Plains will shift westward today. A slightly drier airmass is slated to move into the region from the east today, diminishing rain chances from east to west as the day progresses. Expect highs in the upper 80s near the coast and near 90 inland. Lows will be in the upper 70s near the coast and mid 70s further inland.

Hazardous Weather

Partly Cloudy with a Chance of Thunderstorms
